INTERACTION DESIGN
Fall 2014

Assignment 1 | 27 Feedback

Due to time constraints, feedback has been limited to an overall assessment here with accompanying proficiencies. If you have questions on what you see here, please let me know.

Jeffrey Fennell, Maurice Leavell, & Misa Pham

jtfennell / jefftfennell@gmail.com

Ack—images were not committed! So this is solely based on the text...

...and you know what, despite the lack of images I think you did a pretty good job of communicating your idea, plus explaining your design decisions based on specific concepts from class. I can only imagine how much more effective your presentation would have been *with* the images. Plus, had you covered a few more ideas beyond just the two (in the same way that you talked through Anticipation and Feedback), this would be a real slam dunk.

Your metrics projections sound about right, so that is good as well. The one major knock is the complete absence of references. I think you might have missed some things here by not looking at the literature for work that is related to this. Just because you rendered your work in web form doesn't mean you're relieved from the obligation of citing sources. At the very least, the sources that discuss Anticipation and Feedback deserve a shoutout, and of course the metrics come from Nielsen.

1a — +

1b — +

2b — +

4d — / ...I count here, too, the desire for more concepts being given the treatment that you gave Anticipation and Feedback. You certainly make use of some interaction styles; natural mapping is a no-brainer (I mean, *mirror*, amirite?); and sticky notes definitely owes metaphor and affordances somewhat.

4e — / ...*(ahem)* images *(ahem)*...kinda major.

4f — +

Update based on 12/14/2014 commits:

4d — LOL ask and you shall receive. OK fine. (+)

4e — I have to modulate this one a bit because we really can't shake that they were not committed the first time. But better to be able to fix it promptly, so: (|)
